ANNUAL VITAL STATISTICS REPORT

1981

INTRODUCTION

The data presented in this publication have been compiled from original certificates of Live Birth, Fetal Death, and Death, and from certified abstracts of Marriage and Divorce registered with the Division of Vital Statistics, as provided by law. This report includes statistical data on all events that took place during the calendar year 1981 for which certificates or abstracts were filed with the Division of Vital Statistics prior to March 20, 1982.

COLLECTION AND CLASSIFICATION OF DATA

To understand and make correct interpretation of Vital Statistics, it is necessary to know the method by which these data were collected and classified.

Collection of Certificates

In Ohio, the Vital Statistics law requires the attending physician or person in attendance at the time of birth to file a certificate with the local registrar for each live birth occurring in the state, within ten days after the birth. The funeral director is responsible for filing with the local registrar a certificate for each death or fetal death occurring in the state. The medical portion of the death and fetal death certificates must be completed by the physician who attended the deceased or by the coroner. Each month, the original birth, death, or fetal death certificates are forwarded by the local registrars to the Division of Vital Statistics of the Ohio Department of Health where they are permanently filed.

Certified abstracts of Marriage are filed with the Division of Vital Statistics by the Probate Courts in Ohio; while abstracts of Divorce, Annulments and Dissolutions of Marriage are filed with the Division of Vital Statistics by the County Clerks of Court. Abstracts of Marriage, Divorce, Annulments and Dissolutions of Marriage are filed with the Division of Vital Statistics on the Tenth Day of each month for events that took place during the preceding month.

Classification of Death Certificates

Deaths in this report are classified according to the list of the International Classification of Diseases, 9th Revision, and the code numbers that accompany each death classification refer to this list.

Fetal Deaths are excluded from Birth and Death statistics and are shown as a separate category in this report.

RULES FOR THE ASSIGNMENT OF RESIDENCE

Since many residents of the state and of bordering states use the hospitals in the large cities of Ohio, the number of recorded births and deaths in these cities is large. Therefore, resident data are generally preferable for use in making comparisons between counties and cities in Ohio.

Resident data are obtained by allocating certificates of Birth, Fetal Death, and Death to the resident health district of the mother or deceased.

1. Births and Fetal Deaths are assigned to the place of residence of the mother as indicated on the original certificate of birth or fetal death.

2. Deaths are generally assigned to the place of residence of the deceased. Deaths in Hospitals, Sanatoria, and all other institutions including Mental, Penal, Old Age, and Orphan, are generally assigned to the former residence regardless of the length of stay in the hospital or institution. Infant Deaths in hospitals are assigned to the residence of the mother.

3. Deaths from infective diseases are assigned to the place of residence of the deceased. This is usually the same place where the disease was contracted.

4. Deaths from individual external causes are allocated to the place of residence of the deceased.

5. If the residence of the deceased, or in case of birth the residence of the mother, can not be obtained, the death, birth, or fetal death is allocated to the place of occurrence.

6. Although occurring in Ohio, births to mothers who are residents of other states and deaths of residents of other states are excluded from the resident data; while births and deaths in other states, of residents of Ohio, are included.

ABORTIONS

Information was compiled from confidential abortion report forms sent to the Ohio Department of Health according to law by individuals performing abortions. Data covers forms for 1981 received in this office during the period January 1, 1981 through February 12, 1982.

DEFINITIONS

For this report, the following criteria for classification were used:

LIVE BIRTH - A live birth is the complete expulsion or extraction from its mother of a product of conception, of at least 20 weeks gestation, which after such expulsion or extraction, breathes or shows any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles, whether or not the umbilical cord has been cut or the placenta is attached.

PREMATURE INFANT - A premature (immature) infant is a live born infant with a birth weight of 5 pounds, 8 ounces (2,500 grams) or less.

FULL TERM INFANT - A full term infant is a live born infant weighing more than 5 pounds, 8 ounces at birth.

INFANT DEATH - An infant death is the death of a live born infant occurring within the first year of life.

NEONATAL DEATH - A neonatal death is the death of a live born infant occurring within the first 27 days of live.

FETAL DEATH - A fetal death is death prior to the complete expulsion or extraction from its mother of a product of conception, of at least 20 weeks gestation, which, after such expulsion or extraction, does not breathe or show any other evidence of life such as beating of the heart, pulsation of the umbilical cord, or definite movement of voluntary muscles.

LIVE BIRTH ORDER - Live birth order refers to the total number of live births the mother has had. This excludes fetal deaths and includes this birth and previous births as ascertained from two questions on the birth certificate, "How many other children are now living" and "How many other children were born alive but are now dead".

MATERNAL DEATH - Maternal deaths are those for which the certifying physician has designated a maternal condition as the underlying cause of death. The maternal conditions are those assigned to deliveries and complications of pregnancy, childbirth, and the puerperium.

ABORTION - As defined by Section 2919.11 of the Revised Code, the purposeful termination of a human pregnancy by any person, including the pregnant woman herself, with an intention other than to produce a live birth or to remove a dead fetus or embryo.

DEFINITIONS (Continued)

PERINATAL DEATHS - Fetal Deaths of 20 weeks or more gestation and infant deaths under 28 days.

PERINATAL DEATH RATE - Number of perinatal deaths divided by the sum of fetal deaths and live births X 1,000.

POPULATION - The April 1, 1980 Census Population was used to compute the rates in this publication.

CONVERSION FOR WEIGHT -

1000 Grams or Less = 2 lbs. 3 oz. or Less
1001 - 1500 Grams = 2 lbs. 4 oz. - 3 lbs. 4 oz.
1501 - 2000 Grams = 3 lbs. 5 oz. - 4 lbs. 6 oz.
2001 - 2500 Grams = 4 lbs. 7 oz. - 5 lbs. 8 oz.
2501 - 3000 Grams = 5 lbs. 9 oz. - 6 lbs. 9 oz.
3001 - 3500 Grams = 6 lbs. 10 oz. - 7 lbs. 11 oz.
3501 - 4000 Grams = 7 lbs. 12 oz. - 8 lbs. 13 oz.
4001 - 4500 Grams = 8 lbs. 14 oz. - 9 lbs. 14 oz.
4501 and Over = 9 lbs. 15 oz. or More

RESIDENT DATA - vital events of residents of a particular geographic area regardless to the geographic area where the event occurred.

RECORDED DATA - vital events occurring in a particular geographic area regardless to the geographic area of residence.
